

VALCO GROUP France

For the last 60 years, Valco Group has been a leading provider of reliable Products, Concepts, System Designs and Maintenance of Valves, Actuators & Control systems to its three key markets:

Energy & Industry

(High pressure steam service in power plants; secondary circuits in nuclear power plants; steam generation & transportation).

Oil & Gas industry Downstream

(Refineries; petrochemical plants; chemical plants; LNG: liquefaction, loading, transportation & re-gasification; oil storage safety).

Marine & Offshore

(LPG; ethylene and chemical carriers; LNG carriers; Tankers; Platforms & FPSOs).

The target applications require high-integrity valves. Many of the applications are critical for safety of people and facilities and protection of the environment. To meet the requirements of such critical applications the company is delivering and developing state of the art solutions such as gate, globe and check valves from 1/4" in to 60", in class #150 to class #2500... Also, the systems, values and culture of Valco Group are fully aligned to serve our markets.

Our core attitude is to provide our customers with excellent service from the time of quotation and application consultation, through the delivery process and the full life cycle of the products.

Over the last few years substantial investments in production equipment has been allocated to our facilities in Ruffec. These have been justified by our ambitions to grow and expand our business on the global market place. Valco group's people and our partners in the worldwide agent network support the vision of integrity, quality, service and dependability.

Dedication to delivery

Four companies dedicated to delivery:

Valco Group France is made of its four historical companies:

SNRI SAS

Member of Valco Group France until 2009, the company started manufacturing industrial valves in 1829, under the name of Sergot. Through merging and acquisitions, the name became Serseg, Sereg Schlumberger and then SNRI in 1987.

Malbranque SAS

Member of Valco Group France until 2009, the company started manufacturing industrial valves in 1949 when Marcel Malbranque founded the company.

Valco Valves Services SAS

Member of Valco Group France until 2009, the company started operating in 1990 under the name of SNRI services, then Technor Valves Services and finally Valco Valves Services in 2009.

Valco Group France SAS

Holding company of SNRI SAS, Malbranque SAS and Valco Valves Services SAS.

An incomparable research & development design office

Combining a unique expertise of more than 60 years with the latest technologies, Valco Group research and development design office is continuously working with its clients to propose the best in class valves solutions. All our products are designed by a group of 15 specialized engineers providing following services to the market:

- Research & development
- CAD design
- Stress analysis
- Client request
- Customized solutions
- Specific applications
- Participation of normative committees

Dedication to delivery

The Group has three operational companies in France (Malbranque SAS, SNRI SAS and Valco Valve Services SAS).

The Group revenue in 2013 was 45 M Euro for 240 employees.

Valco Group has valves and related products and services for applications worldwide within Marine sector, Oil & Gas upstream, Oil & Gas downstream and Energy & Industry.

Valco Group's product portfolio contains strong and well established valve brands from in-house production as well as provision of third party products. Our experience has demonstrated our capability to handle the combination of high pressure and very high or very low temperatures. We are also involved in providing products which covers sour services as well as any type of applications where product quality matters.

Dedication to delivery

TWO PRODUCTION FACILITIES DEDICATED TO DELIVERY AND ONE OFFICE SITE

Ruffec, South-West France

- Workshop: 14,000 m²
- Storage: 45,000 m²
- Employees: 180 + 40 Service Engineers

- Machining Equipment: CNC flexible machining center, CNC horizontal lathes, CNC vertical lathes, milling machines.

- Welding & Cladding Equipment: automatic, semi-automatic and manual welding machines. Automatic stellite deposit machine.

- Testing facilities: pneumatic test benches & test pool, hydraulic test benches, cryogenic test benches

Cape Town, South Africa

- Employees: 2 + 8 Service Engineers
- Office site & factory: 1,000 m²
- Contact: Mr. Benjamin SELOSSE
- Address: Unit 1, 4 Clark road Killarney Gardens, Cape Town, 7441
- Telephone: +27 74 204 3244

Abu Dhabi, United Arab Emirates

- Employee: 2
- Office site: 100 m²
- Contact: Mr. Khelil ZALLAG
- Address: Mezzanine 04, Al Falah Street Al Falah Building, Abu Dhabi, UAE
- Telephone: + 971 2 621 2665

CERTIFICATION

Valco Group France products are developed and produced according major international standards such as :

ASME CODE – SECTION VIII
and/or ANSI B31.1
ASTM Materials
RCC-M

API 600

ANSI B16.34
ANSI B16.5
ANSI B16.10

BS 1414
BS 1868
BS 1873
BS 3293
BS 6755
BS 6364

MSS
NACE MR 01.75
ISO 9001
PED CE 97/23

Or under specific client standards and rules.

A unique track record

SNRI & Malbranque have provided valves solutions to major international companies in the world:

- Energy & Industry: EDF, Alstom Power, CMI, Iberdrola, Harbin Boilers...
- Oil & Gas downstream: Shell, Total, Technip, Sonotrach, Petrofac, TR...
- Marine: DSME, Samsung, Hyundai, Mitsubishi, Kawasaki...

QUALITY: OUR EVERYDAY'S FOCUS

The quality of Valco Group France valves is well known all over the world. Non destructive tests such as PMI, dye penetrant, ultrasonic, magnetic particles are performed on routine basis in house.

Valco Goup France is fully equipped to perform hydraulic and pneumatic tests in accordance with API 598 on 100% of the valves manufactured.

Tests are regularly witnessed and subject to verification by all major inspection authorities such as: Lloyd's register, Bureau Veritas, Det Norske Veritas, SGS, TÜV, etc.

At ambient Temperature

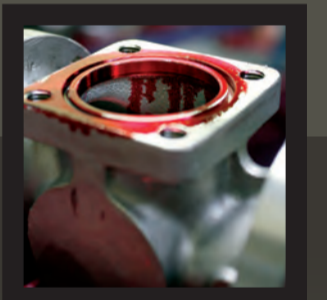

Water tests
Air tests
Helium tests
Nitrogen tests
Pressure test pool (pneumatic)

At cryogenic Temperature

Down to -196 °C

NDE facilities

Dye penetrant
Ultrasonic testing
X-rays
Magnetic particle examination
Positive material identification
Tightness measurements
Thickness measurements
Hardness testing

Service and After Sales: A team of expert available 7 days a week

With more than 50 field technicians and supervisors, Valco Valves Services provides a full maintenance portfolio for all kind of valves and industrial applications:

- Repairs
- Start up
- Dry docks
- Spares parts
- Calibration
- Shut down
- Training
- Obsolescence
